## OBJECTIVE

---

Experienced Software Engineer with 4+ years of hands-on experience designing and developing top-notch web applications. Proficient in a variety of programming languages and technologies, including Node.js, .NET, ReactJS, SQL Server, MongoDB, and DevOps. Skilled in all stages of the software development life cycle, working within Agile methodologies such as Scrum to deliver high-quality projects on time and within budget. Strong focus on code quality and performance optimization, ensuring applications are scalable, maintainable, and efficient.

## SKILLS

---

Language	JavaScript, TypeScript, SQL, C#, Python
Framework & Libraries	ReactJS, Next.js, Redux, Express, .NET, Flask, Django
Cloud	Google Cloud Platform, Firebase, AWS, Azure

## EXPERIENCE

---

<b>Full-Stack Engineer</b> EPAM Anywhere	Apr 2022 - Mar 2023 <i>Remote</i>
---------------------------------------------	--------------------------------------

- Successfully migrated a pre-existing front-end infrastructure, formerly constructed with JQuery, to React. This transformation led to significant improvements in the app's overall performance and ease of maintenance.
- Implemented Google Analytics 4 into the application to track user interactions and analyze crucial business insights that support informed decision-making.
- Ensured the application's reliability and security by updating its dependencies with the latest technology.
- Utilized a wide range of cutting-edge technologies and tools such as Oracle, Jenkins, Jira, Bitbucket, Atlassian, React JS, Spring, SAP Hybris, Google Analytics, Redux-Saga, JavaScript, and JQuery to create a seamless user experience.

<b>Full-Stack Engineer</b> Teleperformance	Jan 2021 - Apr 2022 <i>Remote</i>
-----------------------------------------------	--------------------------------------

- Developed a powerful tool that was specifically designed to enhance the productivity and efficiency of call center assistants, by providing them with a sophisticated dialogue script equipped with a decision tree, which allowed them to offer exceptional customer service in record time.
- Developed new functionalities and deployed the web page using Azure for a web app that improved customer service interactions based on company policies.
- Worked with technologies such as Azure SQL Server, VS Code, Bitbucket, React JS, NEXT JS, Express JS, and Azure.

<b>Full-Stack Engineer</b> SYC	Dec 2019 - Jan 2021 <i>Remote</i>
-----------------------------------	--------------------------------------

- Leveraged a range of technologies, including .NET Framework, ASP.NET, and React JS, to develop EDESK, a project template that reduced development time for different projects in the company.
- Managed deployments and releases of the Artifacts and the APIs using Azure DevOps. This ensured efficient project delivery and effective teamwork.

## EDUCATION

---

Software Engineering, PONTIFICAL BOLIVARIAN UNIVERSITY	2016 - 2021
Cybersecurity, CENTENNIAL COLLEGE	2022 - 2023
